MSSC LABEL APPLICATOR

To create this label applicator we applied smart thinking.

With the MSSC Label Applicator, you can label virtually any round product. Just step on the footswitch activator and labels up to 5" wide can be applied or 7" wide using an optional add on kit. Products are quickly loaded into the applicator with the unique open carriage design and a wipe down brush ensures labels are fully applied to the product. Plus, sizes on the open bottle support can be changed in seconds without using tools. Add the Smart-Jet Blue and you can now easily print everything from date codes to bar codes. It's just another way MSSC provides solutions to help you get around your toughest labeling challenges.

Contact your distributor to order or to see the full line of superior quality MSSC products.
